Software Consultant/Trainer - Remote

Position Summary:

Prometheus8 is a global leader in DevOps solutions, and we are seeking multiple Software Consultant/Trainers to play a meaningful role in scoping, building, and delivering relevant and compelling training material for our clients across a broad range of users, teams, and geographies.

This could be an exciting opportunity for candidates who are looking for either fulltime hours, part time hours, or retirees looking for supplemental income. In addition to being an engaging facilitator, our instructors are also extremely tech savvy.

You should possess strong written and verbal communications skills and you should be comfortable speaking in public. A bachelor's degree is preferred, and we'll be excited if you have experience in small to mid-size adult group facilitation, knowledge of one or more testing softwares, and experience educating adults on technology solutions, both online and in person.

Job Description:

- Conduct discovery sessions in consultation with customers to scope learning needs
- Design tailored curriculum that employs brain-friendly instructional strategies for people in large organizations
- Create learning materials, including facilitator guides and learner documentation
- Deliver learning experiences for a variety of audiences, both virtual and face-to face
- Continuously improve our learning programs and develop new offerings
- Demonstrate excellent judgment in customer relations and in managing company resources
- Performs other duties and responsibilities as assigned

Soft Skills

- Excellent oral and written communication
- Organization and efficiency
- Analytical and technical skills
- The ability to motivate others
- A willingness to be a team player
- A patient and friendly approach to teaching

Technical Skills (any of the following)

- Selenium and/or Appium
- UFT/ALM
- JMeter Performance Tool
- Java Programming Language
- C# Programming Language
- Other Programming Languages

Job Requirements:

Requires a bachelor's degree (Computer Science or equivalent preferred) and at least 3 years of related teaching experience. Experience with software development, automated testing and coding strongly preferred. Strong verbal and written communication skills essential.
